

RECOMMISSIONING DISPENSERS AFTER SHUT DOWN

Restart of Water Dispensers after temporary shutdown of premises. Information has been taken from Watercoolers Europe guidelines.

Customers should be assured that leaving coolers unused for a period is likely only to create quality and not safety issues.

Please carry out the following steps prior to using the dispenser.

After a Shutdown period: Just before re-use:

Bottled Water Dispensers:

- Remove the bottle, drain the cooler through the taps, fit a new bottle and flush 2L water through both taps.
- Sanitise taps and dispensing area with food-safe sanitiser spray or wipes

Mains-Fed Water Dispensers:

- Flush approx. 5L water through both taps.
- Sanitise taps and dispensing area with food-safe sanitiser spray or wipes

Water Fountains:

- Flush approx. 5L water through all taps.
- Sanitise taps and dispensing area with food-safe sanitiser spray or wipes

Hot Water Dispensers:

- Switch the dispenser back on and allow it to reach temperature. Once up to temperature, drain the tank and allow to re-fill
- Sanitise taps and dispensing area with food-safe sanitiser spray or wipes

Watercoolers Europe Advice

We also recommend that you read the full Watercoolers Europe Hygiene & Safety information and guidelines on the restart of water coolers after shutdown which we can provide.
